- The original game is a hidden gem of the Atari 2600 that never got a sequel.

- Gameplay consists of 2 types of levels
 - Space travel
 - Planetary rescue missions

- During space travel you destroy asteroids

- When you arrive on a planet, your shuttle goes to the surface to rescue animals

- After rescuing the animals the shuttle goes back to the mother ship and to the next planet.

- On some planets the ark and the shuttle will be attacked and must rescue all animals before being destroyed.

- Rescuing animals or destroying asteroids replenish shields.

- Planetary defence towers cannot be destroyed.

PLANET

SCORE: 729720
- Mothership remains in orbit

- Can be damaged by planet's defenses

- Shuttle is now controlled by player to rescue animals

- one hit destroys shield and releases one animal, next hit destroys shuttle.

- More than only 2 animals per planet

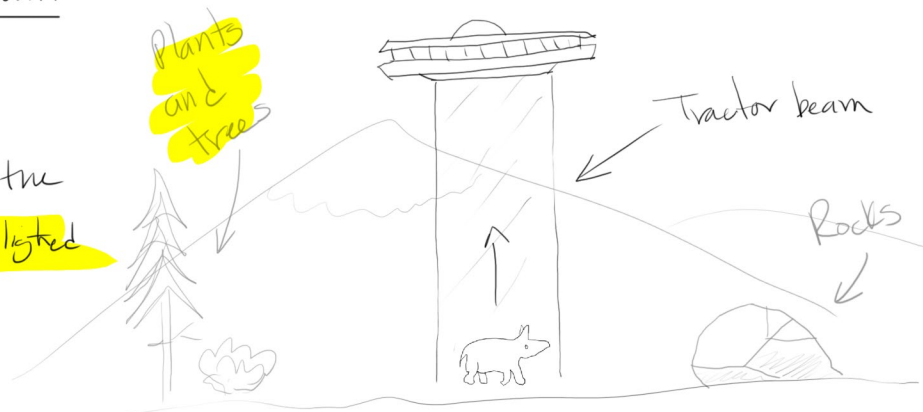

Defense tower can attack both the mother ship and the shuttle

- Smaller animals can be rescued with shuttle, large animals need to be pulled to mothership
